Create IBM DB2 And Connect With Python

The screenshot displays the IBM Cloud Catalog interface. The browser address bar shows 'cloud.ibm.com/catalog'. The page features a search bar at the top with the text 'Search the catalog...'. Below the search bar, there are several service cards arranged in a grid. Each card includes an icon, a title, a description, and a list of supported features. The services shown are:

- DataStage**: Create ETL and data pipeline services for real-time, micro-batch, and batch data orchestration. Supported features: Lite, Free, IAM-enabled, IBM supported.
- Db2**: A fully managed, highly-performant relational data store running the enterprise-class Db2 database engine. Supported features: Lite, Free, EU Supported, HIPAA Enabled, IAM-enabled, IBM supported.
- Db2 Warehouse**: A fully managed, elastic, cloud data warehouse built for high-performance analytics and machine learning. Supported features: HIPAA Enabled, IAM-enabled, IBM supported.
- Dedicated Host for VPC**: Provision single-tenant hosts that offer dedicated resources and maximum control over instance placement.
- Direct Link Connect**: Leverage a Service Provider to quickly establish and deliver connectivity to IBM Cloud locations.
- Direct Link Connect on Classic**: IBM Cloud Direct Link Connect offers private access to your IBM Cloud infrastructure and to any other clouds linked to your Network...

The bottom of the image shows a Windows taskbar with the search bar, task icons, and system tray area displaying the time as 13:23 on 11-11-2022.
